**What are the Slides Like?**

The *Emotional Intelligence PowerPoint® 2.0* program offers dynamic material that is derived from sound research. The presentation flows through the following sections (a selection of sample slides are provided from each section).

**What is EQ Physically and Conceptually?** - Your audience discovers the physical basis for EQ in the brain and develops a conceptual understanding of how EQ operates in the world around them.

**What Does Emotional Intelligence Look Like?** - EQ is present in the movies, TV shows, and televised events that we’ve all been exposed to. Since EQ can be difficult to fully understand without seeing it in action, this section defines each of the four EQ skills and pairs each skill with a short video clip that plays right from the slide to show what the skill looks like in action.
The video clips are good sources of thought-provoking content that can be dissected through group discussion and facilitator-led exercises. If you don’t feel the clips are a good match for your audience, you can do the presentation without them.

Why is EQ Important? Your audience discovers powerful research demonstrating the critical link between EQ and the performance of individuals and organizations. This section also explores interesting, counterintuitive demographic data collected through TalentSmart’s research with more than 500,000 people worldwide, and it provides detailed case studies highlighting the impact of EQ-based interventions in various organizations.
How Can I Increase My EQ? In this section you’ll provide audiences with a detailed method for increasing their EQs including which EQ skill to work on first, how long to work on each skill, which strategies to follow, and how to measure progress. The presentation details 12 of the 66 EQ skill development strategies from the Emotional Intelligence 2.0 book (three model strategies selected for each of the four EQ skills) with optional activities to increase the learning.

The detailed Leader’s Guides included with Emotional Intelligence PowerPoint® 2.0 show you everything you need to know to deliver presentations and conduct trainings from one to four hours in length. You’ll help people to discover EQ, understand why it’s so important, and apply it in their own lives with great impact.
